

Mobile Workforce Management Solutions for Public Services

GeoPal's low cost, productivity enhancing solution enables local authorities to cost-effectively manage staff out in the field.

GeoPal improves protection for lone workers, manages assets in the field, and enables paperless surveys, scheduling and dispatch of jobs to reduce administration time and costs.

GeoPal is a cloud service and mobile app to manage mobile workforces, reducing administration costs and increasing productivity, giving your business a competitive edge.

GeoPal solves common problems and reduces the cost of managing multiple field teams in the environment, road and housing divisions of local government, helping to:

ELIMINATE UP TO 100% OF PAPERWORK AND SURVEY DATA RE-ENTRY

Create mobile forms to capture any kind of data – no need to carry multiple paper forms, camera, and surveyor GPS equipment for risk assessments, surveys, work orders, or additional devices for lone worker protection.

REDUCE ADMINISTRATION TIME AND COSTS BY UP TO 50%

GeoPal gives enhanced visibility & control of operations. For surveys and work on multiple sites, information is accurately captured and saved online, achieving significant time and cost saving by eliminating return visits or data re-entry.

CREATE DETAILED, ACCURATE REPORTS IN MINUTES, NOT DAYS

GeoPal enables real-time reporting and analysis of data captured accurately in the field. Faster, automatic creation of custom surveys, reports and progress updates reduce admin time and increase stakeholder satisfaction.

IMPROVE PRODUCTIVITY BY UP TO 20%

Paperless job workflow and survey form dispatch to mobile speeds job assignment and reporting to enable staff to get more work done. All data collected is verified with time, date and location stamps, for accurate proof of completion.

ENHANCE INVESTMENT IN IT SYSTEMS WITH GEOPAL MOBILITY

Flexibility and open API suite enables you to integrate with almost any existing IT system, including GIS, CRM or portal.

A Flexible Solution for the Public Sector

GeoPal is so flexible in deployment it can be used to manage just about any workflow requirement for your staff out in the field.

Mobility API Services

With GeoPal, I know where each of my team are and where they need to be next. I can see the rich, actionable information coming into the office as it happens, allowing me to send the right people at the right time to resolve the problem.

Fingal County Council**

COST-EFFECTIVE SERVICES. LIMITED BUDGETS.

Public services, such as housing, water, waste, and road maintenance are increasingly affected by tightening budgets while the demand for higher quality services grows. GeoPal eliminates paperwork and reduces administration time to enable the provision of public services at lower cost, making the most of budgets.

SAVE TIME AND COSTS WITH THE LATEST TECHNOLOGY

GeoPal employs the latest developments in cloud and mobile applications to deliver paperless workforce management, health and safety compliance, and asset management in a low-cost solution for local authorities and private partners.

Flexible, paperless scheduling and a robust location monitoring service enable you to make informed job scheduling & dispatch decisions to save time and get more work done. GeoPal's customizable mobile forms can be configured to match any workflow or paper survey form, with all information securely transferred to GIS or project databases, or other IT systems, instantly with no need for data re-entry. This enables faster, more accurate report creation to satisfy stakeholders.

WORK FASTER AND SMARTER FOR HAPPY COMMUNITIES

Improve efficiency in responding to issues reported by residents or employees in the field. Enable local residents to use a citizen portal to register issues such as litter or faults and track the progress of the resolution. Easily connect and integrate GeoPal with existing portals or CRM systems, to transfer information accurately and quickly, to improve response times.

GeoPal is being used a lot for Risk Assessments and surveys. The results are stored on the cloud, making it much easier to extract data for analysis. There is certainly a man-hour saving in avoiding re-typing of paper reports and it has added mobility to our in-house CRM.

Brian O'Shaughnessy, IT Manager, Wexford County Council

Struggling with paperwork for Health & Safety assessments and inspections?

Ensure Healthy & Safety compliance with accurate paperless records of risk assessments and vehicle inspections completed on the mobile app and saved securely in the cloud.

The GeoPal mobile app is used to replace paper inspection forms. All information is time, date, and location stamped and saved instantly online, for real-time reporting.

For example, under EU, UK and Irish legislation, owners of commercial vehicles are obliged to ensure that vehicles are maintained in a roadworthy condition, drives complete regular 'walk-around' inspections, and ensure that defects are rectified in a timely manner.

Lone worker protection is also available with panic alert, non-movement alert and periodic status checks.
