

Mobile Workforce Management Solutions for Transport & Logistics

GeoPal reduces costs for transport and logistics companies by eliminating paperwork and improving compliance.

Transport companies use GeoPal mobility for electronic proof of delivery, real time job status and paperless compliance forms such as equipment and clandestine checks or vehicle inspections.

GeoPal is a cloud service and mobile app to manage mobile workforces, reducing administration costs and increasing productivity, giving your business a competitive edge.

GeoPal solves common problems and reduces the cost of managing drivers in transit, helping companies to:

VERIFY PROOF OF DELIVERY & SEND INVOICES IMMEDIATELY.

GeoPal enables real-time jobs status updates and accurate proof of delivery with 'sign-on-glass' signature capture.

Faster invoice creation improves cash flow, and real-time progress updates increase customer satisfaction.

IMPROVE COMPLIANCE AND PRODUCTIVITY BY UP TO 20%

Location and shift time-tracking provides accurate proof of attendance, to reduce time theft and payroll costs. Route replay identifies route efficiencies to reduce fuel costs and vehicle walk-around inspections are verified & saved online.

REDUCE ADMINISTRATION TIME AND COSTS UP TO 50%

GeoPal enables real-time communication between the office and your drivers. Schedule & dispatch jobs faster and receive job status updates instantly to improve cash flow with faster invoicing. Eliminate paperwork from vehicle inspections to reduce administration time and operational costs.

ENHANCED VISIBILITY OF DRIVERS AND ASSETS IN THE FIELD

GeoPal provides increased visibility and location monitoring of all assets and drivers, whether operating owned or leased trucks. This provides real-time progress updates to increase customer satisfaction.

A Flexible Solution for Transport & Logistics

GeoPal is so flexible in deployment it can be used to manage just about any workflow requirement for your staff out in the field.

Mobile Forms

Map & Locate

Schedule & Dispatch

Time Tracker

Protect & Comply

Mobility API Services

We use an on-board tracking device for our own vehicles, but we have no tracking in our customers' vehicles. Now with GeoPal we can track all our drivers.

We tried a lot of other systems but they didn't fit our business model.

GeoPal is easy to use for both drivers in the field and office users. It has enhanced our communication, cut down costs, and really increased customer satisfaction with our service.

Allen Wilkinson, Director of Operations, EagleOne, USA

ENHANCE INVESTMENT IN IT SYSTEMS WITH GEOPAL MOBILITY

A flexible and open API suite integrates with many IT systems.

COST-EFFECTIVE INNOVATION

Finding innovative ways to manage scheduling, routing and compliance for field employees and drivers and provide a cost-effective service to clients is a challenge.

GeoPal employs the latest developments in cloud and mobile applications to deliver paperless workforce management, health and safety compliance, and asset management in a low-cost solution for Transport & Logistics companies.

GET A COMPETITIVE EDGE WITH THE LATEST TECHNOLOGY

Provide accurate proof of time and attendance by combining time-stamped shift check-in with GPS location monitoring and RFID tag scans. Track locations and usage of assets on the map. Sign-on-glass to insert client signatures directly onto PDF dockets for verified electronic proof of delivery. Issue invoices instantly with real-time job status updates. Flexible, paperless scheduling and a robust location monitoring service enable you to make informed job dispatch decisions, without requiring drivers to return to the depot to collect job packs.

GeoPal enhances visibility, reduces time-theft and eliminates lost paperwork to reduce operational costs for Transport and Logistics companies. GeoPal can be configured to provide mobility support for all your drivers' tasks, and integrates seamlessly with fleet management and other IT systems, enabling you to provide a professional, cost-effective, and competitive service to your clients.

Are your commercial vehicles roadworthy under EU legislation?

Under EU, UK and Irish legislation, owners of commercial vehicles are obliged to ensure that vehicles are maintained in a roadworthy condition, drivers complete regular 'walk-around' inspections, and ensure that defects are rectified in a timely manner.

The GeoPal mobile app is used to replace paper inspection forms. Vehicle checks can include diagrams to mark up and checklists, or use barcodes or RFID scans to prove a complete walk-around.

Ensure health and safety compliance with accurate records of commercial vehicle roadworthiness inspections completed on the mobile app and saved securely in the cloud.

What is GeoPal?

GeoPal is an 'off-the-shelf', yet highly customizable, web and mobile application for creating mobile forms, capturing data in the field, and receiving accurate reports from the field in real time.

A GPS-enabled smartphone and the GeoPal mobile app are used for receiving and filling out mobile forms and capturing and updating information, such as: text, photos, GPS location, asset details, barcode or RFID scans, signatures.

All information captured on the phone is automatically sent to the GeoPal web management system. Managers use the web management system to locate employees and assets on a map, schedule jobs, configure mobile forms, manage assets, and review, process and analyze data collected in the field for reporting.
